J. Huisman & M. Tight (ed.), *Theory and Method in Higher Education Research*, Vol. 5, Bingley UK, Emerald Publishing Limited, 2019, 248 p.

- Higher education research is a developing field internationally, which is attracting more and more researchers from a great variety of disciplinary backgrounds within and beyond higher education institutions. As such, it is an arena within which a wide range of theories, methods and methodologies is being applied. This volume of *Theory and Method in Higher Education Research* contains analyses and discussions of, amongst others, disability frameworks, rhythms research, loose coupling, mixed methods, internet-mediated research, critical whiteness and selection bias.
- **Jeroen Huisman** is Professor of Higher Education in the Department of Sociology, Ghent University, Belgium.
- **Malcolm Tight** is Professor of Higher Education in the Department of Educational Research, Lancaster University, UK.
