Over the last ten years, Rhythmanalysis has become an essential tool in many disciplines, such as Geography, Cultural Studies, Art History, Management, Sociology, Educational Sciences, Philosophy, Political Economy, Urban Planning, and more. Mostly rooted in Lefebvre's, Deleuze's, or Meschonnic's thoughts, a new conceptual and critical trend has emerged. This dossier, which surely should be largely extended, aims to highlight and document this remarkable surge - PM.
